

Profura Acquires the Sawmill Nordanå Trä AB

Profura, through Profura Utveckling AB, has signed an agreement to acquire the sawmill Nordanå Trä AB located in Alfta, Hälsingland. Upon completion, Profura will become the majority owner along with Jonas Linngård, who will remain as a co-owner and board member.

Nordanå currently produces 65,000 m³ of sawn timber, with all raw materials sourced locally from Hälsingland, one of Sweden's best raw material districts. The high-quality sawn products are then sold in Sweden and across the world. Nordanå fosters long-term, well-functioning relationships with both suppliers and buyers.

- There is a longstanding relationship between the Linngård and Ivarsson families, which will now continue in a new arrangement. I am passionate about securing jobs in rural areas, and we will work hard to increase production at Nordanå Trä, says Bernt Ivarsson, owner of Profura and a sawmill enthusiast.
- We have an exciting time ahead of us. Profura brings the experience and expertise needed to future-proof the business and ensure that jobs remain in Alfta. I am optimistic about the future and this excellent collaboration, says Jonas Linngård, co-owner and board member.
- We are really looking forward to continuing to process the high-quality local raw materials. We will continue the Linngård family's efforts to develop and streamline the sawmill and make necessary investments, says Daniel Månsson, Investment Manager.

The intention is for Profura to officially take ownership on November 15.
